EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with James S. Tak on 3/31/05.

1. The application has been amended as follows:

Amend the status identifier of Claim 23 from (withdrawn) to (original). The claim has been considered by the examiner and is allowed as recited below.

2. Cancel claims 7, 21, 30 and 34-65

3. Amend Claim 1 to read as follows:

A method of figuring a substrate surface comprising the steps of:
contacting the substrate surface with an etchant solution, wherein an etch rate of the etchant solution increases with temperature; and
independently controlling the generation of a local thermal gradient in each of a plurality of selected local regions of a boundary layer of the etchant solution independent of other selected local regions, to imagewise etch the substrate surface in a parallel process.

Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 3/16/05 has been entered.

Allowable Subject Matter

Claims 1, 2, 4, 8-10, 15, 17, 18-20, 22-27, 31-33 and 66-73 are allowed.

Art Unit: 1763

The following is an examiner's statement of reasons for allowance: The prior art of record fails to teach or render obvious a method of figuring a substrate surface comprising the steps of contacting the substrate surface with an etchant solution, wherein an etch rate of the etchant solution increases with temperature; and independently controlling the generation of a local thermal gradient in each of a plurality of selected local regions of a boundary layer of the etchant solution independent of other selected local regions, to imagewise etch the substrate surface in a parallel process.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Roberts Culbert whose telephone number is (571) 272-1433. The examiner can normally be reached on Monday-Friday (8:30-5:00).
